

SUCCESS CRITERION 2.2.3 · LEVEL AAA

# No Timing

# “The Internet's already a race; don't make it a timed obstacle course too!”

Who this helps: Cognitive Impairments

SUCCESS CRITERION 2.2.3 · LEVEL AAA

# No Timing

Timing is not an essential part of the event or activity presented by the content, except for non-interactive synchronized media and real-time events.

Principle 2: Operable

Guideline 2.2: Enough Time

# What each role can do

**Product manager**

Eliminate time-based actions unless they are absolutely necessary for the functionality or the content.

**Designer**

Design experiences that do not rely on timed interactions for accessibility.

**Developer**

Avoid code that requires user input within a specific time frame, unless it's critical for real-time or synchronized media.

**Tester**

Check that the website or application does not enforce unnecessary time limits on user actions.

# Once it is fixed

> “You’ve turned the race into a leisurely stroll. How refreshing!”

# WCAG Quotes

Every WCAG 2.2 success criterion, told by the person it helps.

mpaiva.com/wcag-quotes/2-2-3-no-timing

The quotes are written to illustrate the criterion. They are not testimonials from real people.
