

SUCCESS CRITERION 2.3.3 · LEVEL AAA

# Animation from Interactions

“I asked for the bus, and your page sent a roller coaster.”

Who this helps: Photosensitive Epilepsy, Vestibular Disorders

SUCCESS CRITERION 2.3.3 · LEVEL AAA

# Animation from Interactions

Motion animation triggered by interaction can be disabled unless the animation is essential to the functionality or the information being conveyed.

Principle 2: Operable

Guideline 2.3: Seizures and Physical Reactions

# What each role can do

**Product manager**

Implement a system setting to disable animations for users who are sensitive to motion.

**Designer**

Design interfaces that minimize unnecessary animations and provide options to turn them off.

**Developer**

Create preferences in the site's settings that allow users to reduce or eliminate motion animation.

**Tester**

Test the website with animations turned off to ensure that all content remains accessible and functional.

# Once it is fixed

> “With animations off, it's the bus again: smooth, slow and exactly where I asked to go.”

# WCAG Quotes

Every WCAG 2.2 success criterion, told by the person it helps.

mpaiva.com/wcag-quotes/2-3-3-animation-from-interactions

The quotes are written to illustrate the criterion. They are not testimonials from real people.
